NEW: Document Delivery Date for PML/MAP for Medicare CMR Service

As you are aware, CMS requires that a patient (or the representative who participated in the CMR service on behalf of the patient) receive the CMS Standardized patient take-a-way including the Cover Letter, PML, and MAP within 14 days after the CMR is completed.

To make tracking this required information easier, the MirixaProSM platform has been enhanced with a delivery date field. Pharmacies should ensure the delivery date is documented accurately and within 14 days following the CMR service.

For additional information about this enhancement and how it works, click [HERE!](#)

QUALITY SPOTLIGHT:

Making the Most of the Medication Action Plan (MAP)

Your documentation in the Patient Medication Action Plan section of the CMR will be included as part of the patient handout that you're required to deliver to the patient within 14 days of Medicare CMR service as noted above. Use [these tips](#) to get the most out of the MAP that you provide to your patients!

TIME-SAVING TIP:

Remember to Enable Advanced User View

Mirixa understands the resource and time constraints at pharmacy and strives to improve workflow efficiency while always delivering a high-quality clinical service.

Advanced User View:

CMS FWA and General Compliance Training Updated for 2018

Pharmacies that provide services to Medicare patients are required to complete Medicare-compliant Fraud, Waste, and Abuse training ("FWA") and General Compliance Training ("GCT"). Pharmacists and staff must be trained within 90 days of hire and annually thereafter.

The CMS General Compliance and Fraud, Waste and Abuse training modules have been updated for 2018. Please review your current training content and update your General Compliance and Fraud, Waste and Abuse training materials accordingly. Users may take their pharmacy's own Medicare-compliant training for FWA/GCT or access the [Medicare Learning Network](#) website for the [CMS FWA training](#) and the [CMS General Compliance training](#).

In accordance with this CMS requirement, Mirixa requires every MirixaProSM platform user to attest that they have taken FWA/GCT each year.

Mirixa in Action: It's Tradeshow Season!

The Mirixa Team has hit the road this spring attending AMCP 2018 in Boston, MA in late April (left, below) and the PQA Annual Meeting in May (right, below). With more shows coming up later this summer, you are bound to see us. Stop by and visit!

Program Services

Q.

How do I handle medications missing from the Medication List in a Comprehensive Medication Review (CMR) case?

A.

One of the end results of a CMR should be a patient handout delivered to the patient or authorized representative within 14 days of service. This handout must include a complete and up to date medication list (the Personal Medication List), along with clear and concise recommendations for the patient (the Medication Action Plan).

If a patient takes a prescription or over the counter medication, herbal, or supplement not already captured in the case, you should add the medication by typing in the product's name at the top of the Medications section on the Clinical Info tab. After selecting the product, you must add the Prescriber's name, or if it wasn't prescribed (for example, if the patient chooses to take a supplement), type "Self" into the Prescriber field.
