

Developers – positions are located in Mirixa’s Emeryville, California office

Mirixa, a growing healthcare technology company, is seeking engineers who are passionate about building a great product as well as writing immaculate, well-engineered code. Our development process is mainly based on test-driven design to add functionality to our applications.

We are a small development team where everyone takes ownership of big projects and features. The successful candidates will be working closely with other developers in a collaborative environment.

Key Responsibilities:

- Assist with analyzing, designing, and developing high quality web-based applications using .NET technologies
- Other duties as assigned

Education: Bachelor's degree, preferably in Computer Science or a related field or equivalent work experience

Experience: 8+ years of hands-on OOD/OOP experience creating desktop, middle-tier, and web applications using C#, ASP.NET, .NET 4.5+, and MVC; experienced in the design, development, and maintenance of efficient, reusable, and reliable C# code

Skills:

- Working knowledge of front-end scripts like JavaScript, JQuery, Bootstrap, HTML, and CSS
- Strong written and verbal communication skills
- Excellent attention to detail
- Demonstrated analytical, organizational, and project management skills
- Strong ability to multitask, set priorities, and meet strict deadlines

Mirixa offers a competitive benefits package including health, dental, and vision insurance; company 401(k) match; vacation, sick, and personal leave; and paid holidays.

Mirixa is an equal opportunity employer. Applicants should be cleared to work in the United States. Relocation assistance is not available at this time.
