

January 2018

In This Issue!

- 2018 Mirixa Programs are Ready for YOU!
- New Year, New Worksheet
- Targeted Program Best Practices
- Compliance and Quality Reminders for Completing CMR Services

WELCOME 2018

2018 Mirixa Programs are Ready for YOU!

If one of your New Year's Resolutions was to continue to serve your patients to the best of your ability, then completing cases in your MirixaPro queue is one way to make that happen. Log in today - and everyday - to complete cases and provide your knowledge to improve the health outcomes of your patients.

In 2018, we are excited to offer you many opportunities within the MirixaPro platform to serve your patients. MTM Programs currently running include:

- Aetna Commercial MTM
- ESI Commercial MTM
- United Healthcare Medicaid MTM (KS, LA, and WA)

In addition, the following Adherence programs are currently active:

- CVSC Performance Network Program
- Pharmacy Advisor Commercial Program
- Pharmacy Advisor Medicare Part D Program
- SSI Performance Network Program

Next week, several new programs are launching which will bring additional cases to your queue. Be sure to check your MirixaPro queue regularly so that you don't miss out on these valuable opportunities. New programs include:

- Prime 2018 Medicare MTM Program
- University of Maryland Health Advantage 2018 Medicare MTM Program
- VIVA Health 2018 Medicare MTM Program
- WellCare 2018 Enhanced Medicare MTM Program
- WellCare Enhanced Targeted Intervention Program 2018

One last reminder ... make sure you have active users set up in MirixaPro in order to work the cases assigned to your queue. If you have questions about user logins or you need assistance getting a new user set up, please contact Mirixa Support at support@mirixa.com.

As always, we at Mirixa thank you for your partnership through the past year and as we move into the year ahead. We wish you a wonderful 2018!

New Year, New Worksheet

In January, you'll see improvements on the Worksheet Tab to the questions related to confirmed Conditions. These enhancements retain the clinical focus of the MirixaPro platform and add efficiency in content and design.

1. Condition-related Worksheet questions are now arranged as checklist items to help you assess the patient and determine if his or her medication therapy is appropriate for that condition. The shorter phrasing should be simpler to read, and Yes/No answers are listed in columns to make documenting your responses easier.
2. Required questions will still be marked by a red asterisk (*). Once a required question or section is completed, its enclosing box will turn green, and the red asterisk will turn into a green check mark (✓).
3. Want more clinical information?
 - a. Look for the PDF icon. Clinical reference guides are now linked directly to related questions and will open in a new tab as a PDF when clicked.
 - b. Look for the information icon. An in-window pop-up box will appear with brief help text (for example, a list of high- and moderate-intensity statins).

Targeted Programs Best Practices

Follow these three best practices to deliver efficient and effective medication management services:

1. Start on Your Cases Early
2. Save Yourself Time
3. Send Recommendations to Prescribers

Compliance and Quality Reminders for Completing CMR Services

Ensure that you are meeting requirements when completing a comprehensive medication review (CMR) service.

Click [here](#) for details on reminders within the different sections of the MirixaPro platform.
